E Akash Goud – Jr.AI/ML Software Engineer

letsmail.akashgoud@gmail.com 8125824741 in/akashgoud akashgoud2121
Hyderabad

Professional Summary

Junior AI Engineer with hands-on experience building and deploying machine learning, NLP, and GenAI solutions through startup roles and intensive projects. Skilled in Python (pandas, NumPy, scikit-learn, TensorFlow, PyTorch), data preparation, feature engineering, and full-stack implementation of AI-powered applications. Experienced in integrating LLMs into production apps, designing data pipelines with structured and unstructured data, and deploying models on cloud platforms (Vercel, Streamlit Cloud, AWS exposure). Strong foundation in ML basics (classification, regression,clustering), good understanding of MLOps concepts, and proven ability to document experiments and present results to both technical and business stakeholders.

Core Skills

- **Programming & Development**: Python, Java, SQL, Jupyter Notebooks (.ipynb), Django, FastAPI, Streamlit
- **Machine Learning, AI & Deep Learning:** Regression, classification, clustering, computer vision (YOLOv8), NLP, LLM integration (ChatGPT, Gemini), prompt design for content generation.
- **Data & Pipelines:** Data extraction, cleaning, preprocessing, feature engineering, handling structured & unstructured data, basic experimentation workflows.
- **MLOps & Deployment:** Experience deploying ML-backed apps using Streamlit Cloud and Vercel; exposure to CI/CD concepts, model versioning, and monitoring; Git for version control.
- **Web & Backend:** Django, FastAPI, Streamlit, Next.js, REST APIs, MongoDB, SQLite.
- **Research & Publications:** Conference & Scopus Papers, Research on Phd Thesis objectives.
- **Cloud & Tools:** AWS (exposure), Vercel, Git, MS Excel, MS PowerPoint, MS Word.
- **Soft Skills:** Strong analytical and problem-solving skills, clear written and verbal communication, documentation (SOPs/checklists), comfortable working with senior engineers & cross-functional teams.
-

Education

- Malla Reddy College of Engineering and Technology — Nov 2021 – Apr 2025
  - Bachelor of Technology, Computer Science (AI&ML)
  - CGPA: 8.57/10
- SriGayatri Junior College — Jun 2019 – Oct 2021
  - Telangana Board of Intermediate Education (XII)
  - Percentage: 95.6%

Professional Experience

Cognisys AI
Junior AI/ML Engineer — Aug 2025 – Feb 2026
Hyderabad, Telangana, India (On-site)

- Developed and ran multiple deep learning models in Python (TensorFlow/PyTorch) for real-world use cases such as kidney stone detection from medical images, vehicle near-crash detection, and DDoS attack detection.
- Worked on advanced image-processing pipelines including dehazing, denoising, and super-resolution, improving visual quality and downstream model performance on noisy/low-quality inputs.
- Architected and contributed to Career Copilot, an AI-driven resume builder, combining a Next.js front end with ML/LLM-backed services and MongoDB, designed to support up to 1,000 concurrent users.
- Integrated LLM-based content generation into Career Copilot to automatically generate industry-specific bullet points and professional summaries from user resumes and job descriptions using prompt engineering.
- Co-delivered advanced prompt engineering modules to Microsoft employees alongside the CEO, covering practical prompting strategies, LLM capabilities/limitations, and real-world GenAI workflows.
- Built data preprocessing and experimentation pipelines for structured and unstructured data, including dataset preparation, model training, evaluation, and result tracking across multiple experiments.
- Collaborated closely with the CEO and senior engineers to design AI solutions, prepare demos for clients, and document project workflows, models, and experiment outcomes.
- Designed and implemented custom YOLO-based computer vision systems for real-time object detection,achieving significant inference optimization for deployment in production environments.
- Orchestrated end-to-end ML pipelines including feature engineering, model tuning, and performance evaluation, ensuring seamless integration between frontend and inference layers.
- Optimized model latency and system throughput for real-time deployment, managing infrastructure on AWS and Streamlit Cloud with GPU-accelerated training workflows.

AI&ML Engineer Intern
Incline Inventions
Hyderabad, Telangana, India (On-site) May 2025 – Aug 2025

- Developed 10+ machine learning and deep learning models for real-world datasets, enhancing baseline Kaggle codes for higher accuracy and originality.
- Contributed to 4 Conference Papers, 2 Scopus Papers, and 6+ SCI/other papers, handling dataset curation, plagiarism reduction (<10%), and drafting complete documentation.
- Delivered 15+ explanatory videos explaining code and paper pipelines for clients and internal teams.
- Built a Speech Analysis Assistant evaluating speech on 15+ criteria, providing actionable insights for improvement.
- Supported the delivery of AI training modules to partner institutes.
- Strengthened skills in Python, TensorFlow, PyTorch, NLP, data preprocessing, and model optimization, while improving ability to communicate technical work effectively.

Projects

Cognisys AI's Career Copilot –Startup Project | LINK Aug 2025 – Feb 2026

- Developed and deployed Career Copilot, an AI-driven resume builder optimized for high performance and scalability using Next.js, Vercel, and MongoDB.
- Engineered the application infrastructure to handle up to 1,000 concurrent users, ensuring low-latency responses and a seamless full-stack user experience.

- Integrated LLM-based content generation to provide users with industry-specific bullet points and professional summaries based on job descriptions.
- Designed and implemented an ATS-friendly PDF generation engine, ensuring exported resumes remain parsable by automated recruitment systems.
- Implemented advanced security and data integrity features, including encrypted user data storage and secure authentication workflows.
- Skills: Python, Next.js, Machine Learning, MongoDB, Deep Learning, MLOps, System Architecture, Vercel

Speech Analysis Assistant – Startup Project| LINK Jul 2025 – Aug 2025

- Built an AI-powered speech analysis tool evaluating 15+ metrics including fluency, filler words, clarity, pace, and grammar.
- Provided actionable insights for improving communication skills.
- Developed ML/NLP pipelines and interactive UI for seamless user experience.
- Skills: Python, NLP, SpeechRecognition, Streamlit, Machine Learning, Data Visualization

OfficeZenith – Workplace Wellness Assistant – Internal Project / Startup | LINK Jul 2025 – Aug 2025

- Developed a Django-based web app enabling reminders for water intake, screen breaks, exercises, meditation, and custom alerts.
- Implemented backend models, database logging, and a clean front-end UI to improve employee productivity and wellness.
- Skills Used: Django, Python, HTML, CSS, JavaScript, SQLite, Full-Stack Development

Beverage Detection App (YOLOv8) – Internal Project / Startup | LINK May 2025 – Jun 2025

- Developed a computer vision application to detect beverages (Pepsi, Coca-Cola, Mirinda, Mountain Dew) and display nutritional facts.
- Integrated WHO sugar limit checks, health alerts, and personalized tips for users.
- Deployed on Streamlit Cloud with model upload/download functionality for real-world usability.
- Skills: Python, YOLOv8, Streamlit, Pandas, Matplotlib, Computer Vision, Full-Stack Deployment

Certifications

- Salesforce Developer Virtual Internship May 2024 – Jun 2024
  - Salesforce Super Badges: Apex Specialist, Process Automation Specialist, Developer Super Set
- Smart India Hackathon- Internal Hackathon Aug 2023 – Sep 2023
  - Hackathon On Student Dropout analysis for School Education.
